## **TOPSPIN ERP Latest Business Intelligence [BI], Decision Support System [DSS] & Electronic Data Interchange Exclusively For Textile Spinning Industry**

**BI** is a broad category of applications and technologies for gathering, storing, analyzing, and providing access to database in order to help enterprise users make better business decisions out of available alternatives.

DSS is a computer program application so that users can make business decisions and more importantly analyze and justify their decisions [right or wrong decision based on quantified data **[Not subjective]**]

TOPSPIN ERP inbuilt data analysis models can extract business intelligence for improved level of your business decisions and their scientific justification.

As a matter of fact TOPSPIN ERP BI and DSS tool can impart drastic benefits rather than incremental. The focus areas are scientific fiber purchase, mixing and costing based marketing in particular to close the individual sales deal.

Further, future of 'Information Technology' [IT] is embedded in electronic automation [EDI] i.e. retrieving data electronically and directly in the ERP database from barcode scans, productive machines having electronic interface, testing equipment, electronic attendance devices etc. This eliminates data feeding efforts and maintains absolute data accuracy.

We offer these powerful TOPSPIN ERP attributes, pertaining to BI, DSS and EDI at extremely competitive cost to the spinning units in India.
