

ATWSPL

Yarn Trading

Since Deepawali festivals 2018 onwards, we have added another dimension to our business activities i.e. yarn trading.

We have started this yarn trading venture with a difference. We are not only incorporating the traditional way but being an IT company providing TOPSPIN ERP Solutions to spinners, adding further value of latest IT tools, services and technologies with updated information for our customers.

We have a clean database of around 450 yarn buyers and 175 spinners all across India for domestic/merchant and export sales.

We are very selective with yarn sourcing as we prefer to associate us with the quality conscious spinners having state of the art machinery and excellent work culture.

We have the priority to source yarn on pan India basis who have committed deliveries and strictly adhere to buyers yarn quality norms.

We deal in cotton, Synthetic, wool 100% & blends. We can also arrange to develop specialty yarns through our long amicable relations with textile community
